

YIPING DENG | RESUME

Full-stack Developer / Penetration Tester / Math Lover

Status: Pursuing Bachelor of Science in Computer Science

College Ring 7 PO 182, 28759 Bremen, Germany

Fields: Computer Science, Math, Machine Learning, Cyber Security

scottd.cn

Prefers: C++, Scala, Python, Java, JS, React.js, Docker, Spark, Git, Azure, Spring Boot/MVC/Data, Hibernate

y.deng@jacobs-university.de

Activities: Baking, Reverse Engineering, Software Fuzzing, Hardware Hacking

+49 162 683 6614

Experience

Machine Learning Engineer Intern - Ubimax GmbH

2018/6 - Present

- Built image classifier training/deploying/evaluating system on AR devices(Google Glass Enterprise/ Vuzix M300)
- Full-stack development, machine learning research focusing on image classification/object detection

Hilbert 10th Research - Jacobs University Bremen Mathematics Department

2017/10 - 2018/5

- Guided research, Hilbert Tenth Problem proof formalization using Isabelle, proved DPRM theorem
- Co-authoring of paper & presentation(click to see): [Hilbert Meets Isabelle](#) - FLoC 2018

Google Code-in 2017 Mentor - Google Code-in

2017/11 - 2018/1

- Guided middle school students contributing in open source project
- Responsible for monitoring, reviewing and fixing the code contributed by students

Cyber Security System Design - Tsinghua University Software Security Lab

2016/6 - 2016/9

- Implemented code clone detection system(binary code clone detection based on AC automata)
- Implemented database security management system and crawler for GitHub in Scala(both based on Akka)

Google Code-in 2016 Mentor - Google Code-in

2016/12 - 2017/2

- Helped students from Asia to involve in open source movement
- Supervised software development lifecycle in the competition

Embedded System Design - Green Hunan

2016/4 - 2017/6

- Designed specialized drone system for air pollution monitoring(home-made drone with Android device mounted)
- Invented cheap home air pollution monitoring system based on Sharp sensor(Arduino)

Contributor / Developer - FOSSASIA

2015/11 - Present

- Early contributor for loklak and SUSI AI
- Mentored CodeHeat competition

Education

B.S. in Computer Science and Mathematics - Jacobs University Bremen

2017/9 - Present

- Extensive course in Haskell, C and C++ programming, top student in Computer Science and Math
- Guided research in Hilbert 10's problem and automatic theorem proving, finished Machine Learning course

Project

TantanRank - Facial image classifier

2017/7 - 2017/9

- Built a social network picture collector and uses TensorFlow CNN neural network to classify user pictures
- <https://github.com/DengYiping/TantanRank>

loklak - Twitter distributed crawler / search engine

2015/11 - Present

- Fixed several bugs in the code base, helped students in GSoC/ Google Code-in for contribution
- Shifted the crawler to a generic crawler that collects also from Github, Youtube and Weibo
