

YIPING DENG | RESUME

Full-stack Developer / Penetration Tester / DevOps

Status: Pursuing Bachelor of Science in Computer Science

Fields: Computer Science, Cyber Security

Prefers: C++, Scala, Python, Java, JS, React.js, Docker, Spark

Activities: Baking, Reverse Engineering, Open Source Software Development

College Ring 7 PO 182, 28759 Bremen, Germany

Experience

Machine Learning Engineer Intern - Ubimax GmbH

2018/6 - Present

- Designing Customizable Machine Learning Training/Deploying system for wearable devices
- Augmented Reality integration with Machine Learning system

Hilbert 10th Research - Jacobs University Bremen Mathematics Department

2017/10 - 2018/5

- Hilbert Tenth Problem proof formalization using Isabelle
- Co-authoring and conference presentation: **Hilbert Meets Isabelle** - FLoC 2018

Google Code-in 2017 Mentor - Google Code-in

2017/11 - 2018/1

- Guided middle school students contributing in open source project
- Responsible for monitoring, reviewing and fixing the code contributed by students

Cyber Security System Design - Tsinghua University Software Security Lab

2016/6 - 2016/9

- Invented code clone detection system distributed algorithm
- Implemented real-time database security management system

Google Code-in 2016 Mentor - Google Code-in

2016/12 - 2017/2

- Helped students from Asia to involve in open source movement
- Supervised software development lifecycle in the competition

Embedded System Design - Green Hunan

2016/4 - 2017/6

- Designed specialized drone system for air pollution monitoring
- Invented cheap home air pollution monitoring system based on Sharp sensor

Contributor / Developer - FOSSASIA

2015/11 - Present

- Full-stack development for loklak and SUSI AI
- Mentored CodeHeat competition

Education

B.S. in Computer Science - Jacobs University Bremen

2017/9 - Present

- Studied Object-Oriented Programming, extensive course in Haskell, C and C++ programming
- Guided mathematical research in Hilbert 10's problem and automatic theorem proving

Project

TantanRank - image classifier

2017/7 - 2017/9

- Built a social network picture collector and uses TensorFlow CNN neural network to classify user pictures
- <https://github.com/DengYiping/TantanRank>

loklak - Twitter distributed crawler search engine

2015/11 - Present

- Fixed several bugs in the code base
- Shifted the crawler to a generic crawler that collects also from Github, Youtube ...
